

## **GREEN ZONE Proposal and Recommendation Form**

A “Green Zone” is a designated area of land in which human impacts are to be avoided. This form is used to propose boundaries of a green zone that may be established, recorded, and protected. The Site and Facilities Manager will verify the green zone and see that it is recorded and mapped. Green zone designation may be recommended by booth reps, crew coordinators, camp hosts, campers, Vegmanecs, biologists, or others.

For active bird nests or other wildlife, notify the Quartermaster's Wildlife Team for rapid response. Bird nests need to be addressed quickly. Sites consistently used by nesting birds or critical habitat for other wildlife may be candidates for green zone designation. For more information on vegetation and wildlife management, see

<https://lump.oregoncountryfair.org/Documents/Handbooks/LumpManualCurrent.html>

**Name of advocate and OCF affiliation** (advocate should serve as primary contact and may also be the steward of the green zone):

Phone and email of advocate/steward:

Protocol: Stewards install signs and flagging weeks before Fair and remove them after. Stewards record the date the zone is flagged and the date flags are removed, inform and educate neighbors and others, monitor compliance and refer disputes to the camping crew, Vegmanecs, BUMS or Site and Facilities Manager.

**Other contacts** (optional), such as people who have expertise or experience with the area, species, resources, etc.:

**Reason for request** to designate this green zone (e.g., sensitive species, critical wildlife habitat, viewscape barrier, physical barrier, aesthetics/ambiance, Vegmanec intervention, camping arbitration):

**Location** of zone: (center point and/or borders)

Mapped location

Map name and grid or named location:

GPS data:

Description of location:

Size of zone (e.g., measured on the ground or by GIS or GPS)

Is there an agreement among stakeholders? Is it in written form?

**Vegetation** (optional):

Plant species present, relative abundance of each species

Plants or species of special interest

Non-native vegetation present

**Submit this completed form to the Site and Facilities Manager** for verification and recording.
